SUMMARY

Creative and results-oriented **Frontend Developer** with expertise in **React.js, JavaScript (ES6+)**, and **modern front-end technologies**. Skilled in developing **responsive, interactive**, and **high-performance web interfaces** that deliver exceptional user experiences across devices. Proficient in **state management** using **Redux Toolkit**, **RESTful API integration**, and **asynchronous programming**. Experienced in implementing **UI animations** and **motion effects** using tools like **Motion** and **CSS animations** to enhance engagement and user interaction. Adept at writing **clean, maintainable**, and **scalable code**, collaborating effectively with **cross-functional teams**, and ensuring alignment with **UI/UX best practices**. Passionate about building **innovative, visually engaging solutions** and staying up to date with the latest web development trends and technologies.

WORK EXPERIENCE

Software Developer, Quotus Software Solutions

September 15, 2024 - Present

- Developing **responsive** and **dynamic user interfaces** using **React.js, JavaScript (ES6+)**, and **modern front-end frameworks**, ensuring seamless **performance** across all devices.
- Implementing **state management** using **Redux Toolkit** to maintain **efficient** and **scalable** application architecture.
- Collaborating with **cross-functional teams** to **integrate RESTful APIs**, manage **asynchronous operations**, and deliver high-quality, client-focused solutions.
- Writing and deploying **Ethereum smart contracts** using **Solidity**, and **integrating blockchain** functionalities with **frontend applications** for **decentralized** platforms.
- Working closely with senior developers to **optimize** user experience, debug complex issues, and ensure smooth interaction between **frontend, backend**, and **blockchain** layers.
- Utilizing **Git** for **version control**, following best practices in code review, **branching**, and collaborative development workflows.

EDUCATION

September 2022 – June 2024

Master of Computer Applications
GITA Autonomous College Bhubaneswar
SGPA: 8.5

TECHNICAL SKILLS

Frontend Development: React.js, Redux Toolkit, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Framer Motion

Backend Development: Node.js, Express.js

Blockchain Development: Ethereum, Solidity, Smartcontract, MetaMask

UI/UX Design: Responsive Design, User-Centered Design, API Integration, Animation & Motion Effects

Programming Languages: JavaScript, C, Solidity, HTML, CSS

Version Control: Git, GitHub

PROJECTS

1. Blockchain-Based Gaming Platform

- Developed the **entire frontend architecture** of a **blockchain-based gaming platform** using **React.js** and **Tailwind CSS**, focusing on **responsive design**, **high performance**, and an **intuitive user experience**.
- Designed and implemented a **feature-rich admin dashboard** to efficiently manage **users**, **game configs**, **transaction data**, and **bonus distribution**.
- Integrated **blockchain games** with the **frontend**, ensuring **secure and seamless interaction** with **Ethereum smart contracts** and **wallet connections**.
- Utilized **Redux Toolkit** for **global state management** and **TanStack Query** for **API caching**, **data synchronization**, and **optimized performance**.
- Collaborated with **backend** and **blockchain** teams to ensure **smooth communication between the UI, APIs**, and **smart contracts**, resulting in enhanced **stability** and **user engagement**.

2. E-Commerce Platform

- Contributed to **UI development** and **API integration** using **Angular**, ensuring smooth **data flow** and **responsive interface** behavior.
- Assisted in developing and refining **frontend components**, focusing on improving user interactions and overall user experience.

3. Company Website

- Developed the **official company website** using **React.js** and **Tailwind CSS**, incorporating **Motion** for smooth, interactive animations.
- Designed a **fully responsive, modern UI**, optimizing performance, accessibility, and user experience across devices.
- Integrated **brand-focused design elements** to enhance user engagement and trust.
- Implemented **animation effects** and **interactive transitions** using **Motion** to create dynamic visual interactions.
- Ensured adherence to **SEO best practices** and **frontend performance optimization**.
